## QMS46T

### 37.8 kW max. at 1500 rpm

#### **TECHNICAL DESCRIPTION**

#### **ENGINE BASE**

- 4 strokes Diesel engine tested in all marine or industrial applications throughout the world.
- Engine block in cast iron type tunnel and timing gear.

#### **INJECTION AND COMBUSTION SYSTEM**

- The Super Glow System comes as standard equipment to start the engine in cold temperatures.
- The E-CDIS injection system produces an ideal air/fuel mixture by creating three vortexes in the combustion chamber. The combustion efficiency is improved, resulting in low fuel consumption.

#### COOLING SYSTEM

- Cooling is ensured by heat exchange between coolant and seawater in an heat exchanger, or via a Keel Cooling system.
- Seawater pump with rubber impeller.

#### **GENERATOR**

- Delivering a continuous power of 34.4 kW and able to provide up to 37.8 kW
- IP23 protection
